e menu

Menu on a Finger Touch ......

- Place your Dish order by a finger Touch
- Quick KOT Generation
- No Manual Data Entry
- Reduces Manpower Cost
- Increased Customer Attraction
- Paper less .. Saves Green energy

e-menu replaces the traditional Paper based Restaurant/Bar Menu with an Android based tablets which are available at a very economical cost. The data entry free operation makes it as very Accurate, efficient, fast and paper less. These solutions are designed for the small restaurants to the biggest with various features. Also it makes an Effective and Transparent transaction. Various MIS reports are available on a single click which makes easier to analyze the day to day business .

Advantages:

- Simple and faster Menu processing on a wireless network.
- Traditional system of waiter going to the kitchen for order placing is eliminated.
- Paperless system saves paper and green energy
- Instant display of bill on the tablet PC avoids delay in bill delivery to customer
- Various MIS reports and analysis on a click
- Effective and Transparent transaction
